SUMMARY

Senior Full-Stack Engineer with 15+ years of experience, specialising in Laravel and Vue.js/React.js and working across Node.js, Python and Go. 5+ years leading teams of up to 10 engineers as architect, developer and mentor. Delivered products from architecture through release, from enterprise web platforms and CRM systems to cross-platform mobile apps (Capacitor) and agentic AI systems. Rated excellent by international clients through Proxify hiring platform.

EXPERIENCE

Owner / Senior Full-Stack Engineer
08/2024 – Present

Easio | Sarajevo

- Client: Energielenker Solutions – Built the energy platform for controlling Enbas and Lobas devices (Vue.js/TypeScript, PrimeVue, Figma), then the Android and iOS apps (Capacitor) with native push notifications (Kotlin, Swift, Firebase Cloud Messaging, APNs, Gradle). Integrated Laravel, ZITADEL, Redis and OAuth 2.0 / JWT; deployed with Docker and GitLab CI on AWS; tested with PHPUnit, Vitest and Playwright.
- Client: Mina Bästa Polare AB – Built 3 international websites with Next.js/React.js and Nuxt.js/Vue.js (Sass), and helped build an internal calendar synchronisation app with Microsoft Graph API and Laravel. Ran development environments in Lando and Docker, with Vitest tests and Sentry error tracking across frontend and backend.
- Built the AI integrations platform for a client's 10 partner companies: agents create and edit users' documents, with isolated account data. Shipped as an installable package with a manual. (Go + React.js)
- Built end-to-end AI automation pipelines for the marketing and finance departments using Python and n8n, covering web scraping, LLM processing, Google Sheets, the WordPress API, and third-party integrations, reducing manual workload by more than 50%.

Full-Stack Technical Lead
04/2023 – 08/2024

Sun-x | Munich

- Managed a team of 5 engineers on a project with a microservices architecture (Docker, AWS, Amazon Redshift for analytics), collaborating with a Python-based data science team. Introduced Agile/Scrum for the team. Onboarded and mentored new engineers as the engineering group grew from 2 to 20.
- Architected a scalable database from scratch, optimised for performance, and implemented microservices-based APIs, cutting data retrieval from 5 minutes to 3 seconds. Ran queue-based imports of millions of records per day with Laravel Horizon.
- Cut deployment time tenfold by moving releases from manual to automated with Bitbucket Pipelines, Envoyer and Forge, and reviewed code across PHP, Laravel, Python and Node.js.

Senior Frontend Engineer
03/2022 – 03/2023

Small Planet | New York

- Upgraded a Smartstore e-commerce platform and built a 3D shopping experience (Vue.js + Three.js). Added in-checkout coupon recovery that rescued 22% of at-risk carts and cut catalogue search latency by 65% with Elasticsearch. (Vue.js + Three.js + Elasticsearch + MSSQL + Azure + Docker)
- Developed corporate website using Jekyll, resulting in 3x more customer inquiries.
- Built React.js and Vue.js web applications on Laravel backends with Jest tests, and cut page load times by 20% with lazy loading and asset optimisation. (Redux, Vuex, Pinia, Gutenberg)

Lead Full-Stack Engineer
01/2017 – 03/2022

Code Line Solutions | Sarajevo

- Led 10 engineers delivering an enterprise CRM used by 200 users in 4 countries and 10 departments. Architected its database and consolidated internal and external data into reports for executive decisions. (Laravel, PHP, Vue.js, SQL, Bootstrap, PHPUnit, Sentry, Azure)
- Built in 10 days an internal office-space visualisation app, integrated with the HR module and used in all four countries, powering a COVID seat-booking ticketing system. Hosted on Azure with AWS S3 and RDS. (Node.js + PostgreSQL + Angular)
- Interviewed about 100 engineering candidates as part of the hiring process.

Senior Full-Stack Engineer

09/2011 – 01/2017

Alfa Energy | London

- Developed an enterprise intranet used by 200 employees, hosted on Azure, replacing manual Excel-based workflows with automated sales proposal generation, automated email dispatch, and employee performance metrics tracking. (PHP + AngularJS + MySQL + SCSS)
- Designed and built AlfaGoals, an energy procurement tracking tool used by 4 teams in 4 countries. Its sales-goal reports showed managers how many calls a rep needs to close a deal, and sales rose 15% after rollout. (PHP, Ember.js, Anime.js, MySQL, SCSS, Azure)
- Built an enterprise equipment inventory and purchase-order system covering all office equipment, from furniture to computers, for 200 employees, centralising roughly €150,000 of yearly orders in one place and reducing human error. (VBA)

SKILLS

Languages: PHP, JavaScript, TypeScript, Python, Go, VBA
Backend: Laravel, Laravel Horizon, Node.js
Frontend: Vue.js, Nuxt.js, React.js, Next.js, Angular, AngularJS, Ember.js, Three.js, Redux, Vuex, Pinia, PrimeVue, Gutenberg, Jekyll, HTML5, CSS3, Tailwind, Bootstrap, Sass/SCSS
UX/UI: Figma
APIs & Auth: REST API design, OAuth 2.0, JWT, ZITADEL, Microsoft Graph API, WordPress API
Database: MSSQL, MySQL, PostgreSQL, Redis, Elasticsearch, Amazon Redshift, Database Architecture
DevOps: Git, GitLab CI/CD, Bitbucket Pipelines, Docker, Lando, Laravel Forge, Envoyer, AWS (S3, RDS, Redshift), Azure
Mobile Development: Capacitor, Android, iOS, Kotlin, Swift, Gradle, Firebase Cloud Messaging, APNs
Testing & Monitoring: PHPUnit, Vitest, Jest, Playwright, Sentry
AI/Agentic: n8n, LLM integration, AI agent orchestration, multi-tenant data isolation
Practices: Microservices, Agile/Scrum, GDPR compliance, Code Review, Mentoring

PASSION PROJECT

Network ad blocker on Raspberry Pi github.com/edinzujodev/adblocker

A home ad blocker in the style of Pi-hole: a small DNS server that answers ad and tracker domains with 0.0.0.0 / :: and forwards everything else to an upstream resolver, with a dashboard to review and analyse activity and manage block lists. A single Go binary, developed on Windows and built to run on a Raspberry Pi 3 Model B+ (linux/arm64).

EDUCATION

Master of Business Administration (MBA) University of Zagreb — 2010 – 2011 | Grade 9.8 / 10.0

BSc in Computer Science (4-year programme) University of Buckingham — 2006 – 2010

CERTIFICATIONS

Data Protection (GDPR Compliance) — DataGuard (2024)
Microsoft Certified: Azure Fundamentals — Microsoft (2023)
Artisan Laravel Developer — certificates.dev (2022)
OpenJS Node.js Application Developer (JSNAD) — OpenJS Foundation (2017)
Bulletproof Web (Ethical Hacking) — Academy387 (2015)
Intermediate PostgreSQL — Academy387 (2012)

AWARDS

Most Valued Alfarian Award — Alfa Energy

VOLUNTEERING

Founder and Volunteer Ruku na srce — 2011 – 2020

Charity organisation
